

JOHN DEERE

KOENIG

TECHNOLOGY THAT'S MORE AFFORDABLE, MORE ACCESSIBLE, AND MORE ADAPTABLE.

Whether it's a farmer, rancher, or high value crop grower, greater precision is helping them get more out of less, even with older machines and non-Deere equipment. Now, it's easier than ever to bring precision to your farm, with special pricing on bundled Precision Essentials. Three core pieces of hardware to open up additional automation tools:

- Choose either a G5 or G5^{PLUS} Display to give you more space for modules and customized run pages
- StarFire™ 7500 Receiver with SF-RTK that delivers long-term repeatability and up to 2.5 cm accuracy
- JDLink™ Modem to connect your machines for 24/7 monitoring anytime, anywhere

ONE TECH PACKAGE. ONE LOW COST.

Once you have the hardware, you can choose one of four affordable technology licenses according to the exact needs of your operation.

Hardware included. Does not include taxes. Does not include harness, wiring, or installation costs. Additional license fees required. Limited availability while supplies last. Purchase of multiple year licenses not required. See your John Deere dealer for details.

KOENIG PRECISION ESSENTIALS

No matter the crop, no matter the livestock, no matter the size of your operation, Precision Essentials helps you do more with less, so you can pull more value out of every acre you work.

ROW CROPS

Managing multiple operators, machines, and fields? Then you know... time and accuracy matter. Precision Essentials opens the door to time-saving guidance and automation technologies that can help you squeeze more dollars out of every pass – from tillage and planting to spraying and harvesting.

DAIRY & LIVESTOCK

Whether you're a full-time rancher or a part-time farmer, lowering upfront costs is vital. And so is controlling your input costs. Precision Essentials gives you affordable access to tools like AutoTrac™, Section Control and Rate Control – technologies that can help you reduce skips and overlaps. By lowering input costs, you put more money in your pocket instead of your fields.

HIGH VALUE CROPS

As a specialty crop grower, you know the risk of over application, especially when you're dealing with a lot of acres and multiple machines. With Precision Essentials – and technologies like John Deere Rate Controller – you can accurately document every pass, every application, every machine. That gives you precise data that keeps you in the know. And when you know, you control. And control gives you more productivity and savings in any crop.

CHOOSE YOUR PRECISION LICENSE

1 AUTOTRAC™

- AutoTrac

2 ESSENTIALS

- AutoTrac
- Section Control
- RowSense™

3 ESSENTIALS + SF-RTK

- AutoTrac
- Section Control
